### UNC Chapel Hill Protects Students and the Bottom Line with CS Gold and NICE's Intelligent Video Solution

**Ithaca, New York:** The CBORD Group, Inc., the leading provider of campus card and integrated security solutions to colleges and universities, is pleased to announce that the University of North Carolina at Chapel Hill (UNC Chapel Hill) is using the CS Gold<sup>®</sup> campus card solution from CBORD<sup>®</sup> and the NiceVision<sup>®</sup> intelligent video solution from NICE Systems to better manage financial, access, and other security operations across campus.

UNC uses CS Gold for applications including meal plans, stored value and credit transactions, entitlements, access control, snack and beverage vending, laundry purchases, copy/print purchases, and more. CS Gold also helps UNC tailor its access control to meet the needs of different facilities—UNC Chapel Hill has installed Handkey II<sup>®</sup> biometric readers to allow student athletes entry into certain athletic facilities without the need to carry a card.

Looking to improve campus security while maximizing its existing investments, the university also selected a NiceVision Network Video Recorder (NVR) solution from NICE Systems, a CBORD partner. The university's new NiceVision NVR solution integrates with CS Gold to instantly notify UNC security operators of when and where a security breach took place, and automatically display live video from the incident scene. The university, which is expanding its use of video surveillance to new areas on campus, is also migrating to IP cameras. NiceVision NVR gives UNC easy expandability along with a seamless migration path to IP by allowing the university to manage IP and analog cameras through a single, unified interface.

“The UNC One Card Office is vital to providing our students, faculty, and staff with a one-of-a-kind campus experience, and CBORD solutions, combined with NICE, help us do that,” says Jim Clinton, Director of the One Card Office at UNC Chapel Hill. “We provide a safe and secure means of performing financial transactions across campus. We provide access to academic and administrative buildings and manage parking access for the entire university. We manage camera surveillance, gym memberships, and a host of other activities. Finally, we provide actionable data to a wide variety of

stakeholders through the reports we write from the CS Gold database. We touch many areas of our campus through the technology CBORD offers us.”

“We are very pleased to partner with CBORD to provide UNC with an upgraded solution to address the university’s security needs,” says Chris Wooten, President, NICE Security Americas. “The integrated NICE/CBORD solution provides enhanced capabilities for handling security incidents, at the same time offering UNC easy migration to IP video, while preserving existing infrastructure investments.”

“As the demand continues to increase for comprehensive campus security, universities are embracing the benefits of a unified security technology strategy,” says Cindy McCall, Vice President, Marketing, The CBORD Group, Inc. “CS Gold and NiceVision are used together at universities across the country to share actionable information and improve response times. We are glad to offer this solution to our long-time, valued customer, UNC Chapel Hill.”

#### **About The CBORD Group, Inc.**

The CBORD Group serves colleges and universities, corporations, healthcare facilities, chain restaurants, supermarkets, and a host of other market segments.
