## Carlton Green Named Silver Plate Award Winner

*Ithaca, New York*—The CBORD Group, Inc., congratulates Carlton Green, Ph.D. Director of Nutrition at the UCLA Medical Center, and the recipient of the Silver Plate Award in the Healthcare category. The award, given by the International Foodservice Manufacturers Association (IFMA), recognizes the industry's most accomplished and outstanding foodservice operators in nine market segments. Green uses CBORD systems for foodservice management at UCLA.

“CBORD played a major role in our success,” said Green. “After implementing their forecasting system, we reduced our budget by \$2.5 million in one year without laying off one person.”

Green achieved those results through cost-cutting strategies including CBORD's forecasting and recipe costing systems. These systems enabled Green's department to cut their waste tremendously through increased accuracy with production, inventory tracking and record keeping. Additionally, the department's cash revenues were increased by \$100,000 a month and patient satisfaction went up by 80%.

The CBORD Group, Inc., located in Ithaca, NY, is a worldwide provider of computer software systems for foodservice and dietary management, with 26 years of experience serving over 4000 clients worldwide.
