

SMALL STEPS AND GIANT LEAPS

Moving from an Offline to an Online World at
The University of Texas at Arlington

A CBORD Webinar

Introduction

Webinar Panelists

Phil Parrish

Account Manager, CBORD

David Angel

Assistant Director of Card
Services, UTA

Jeff Koziol

Account Manager, Allegion

Beth Koziol

Client Development Group
Manager, CBORD

The University of Texas at Arlington

About UTA

UNIVERSITY OF
TEXAS
ARLINGTON

28,218 undergrad enrollment

10,000 students living on or adjacent to campus

300 campus organizations

100 + campus buildings

Vision

Idea: Offline to Online

Replacing offline locks with new, more powerful and secure online locks was the idea and maybe even a dream for the budget-conscious university. What planning needed to happen in order to make this dream a reality?

Timeline

Offline to online lock conversion

Existing Hardware

Older AD-250s and legacy offline locks

Plan

Campus Card Operations started small, and bought locks incrementally as replacements across campus

As of today...

The University of Texas at Arlington now has around 900 online locks on doors.

Future plans

Continue expansion of online locks accross campus

Offline Lock

Schlage AD-200/AD-250 or Legacy Schlage CM/CL Series

Jeff Koziol

Account Manager, Allegion

“Rights On Card”

Requires encoding of the student ID card with access rights on open track of magnetic stripe

“Rights in Lock”

Requires touring of the individual locks with a hand-held device for programming/access changes

Both solutions require touring of the locks to retrieve audit history

Online Lock

Schlage AD-400 or Schlage NDE Series

Jeff Koziol

Secure, encrypted data transmission

Ideal for non-invasive installations for historic or sensitive areas

Unique communication protocols won't interfere with other wireless networks

UTA ID Card

Benefits of Mav Express Card

Purchasing food items at various dining facilities

Verifying identification

Health services

Maverick Center activities entry

Campus elections

Computer labs

Class attendance

Access to residence halls and other buildings

Reporting

Access Control

Mobile ID

Webinar Takeaways

- ❖ **When evaluating solutions, keep in mind the overall management and true cost, and not only the initial investment**
- ❖ **Online locks offer greater data management and reporting advantages over offline**
- ❖ **Keep an eye on options for future proofing with reader modularity and multi-tech options**
